

# iProv Case Study: Monthly report on-line application for AR Baptist Collegiate Ministry, Little Rock

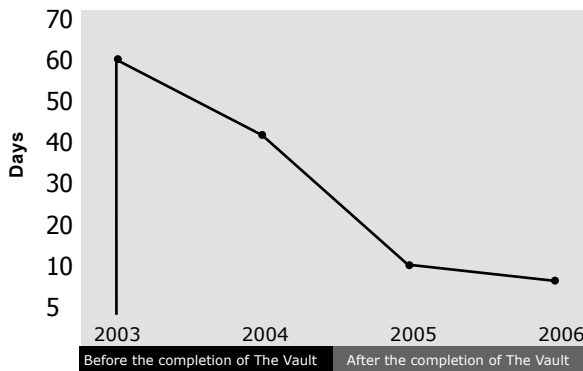

## Synopsis:

The Arkansas Baptist Collegiate Ministry employs 35 campus ministers from all over the state. Each month those ministers were required to submit monthly reports to their superiors. These reports were e-mailed and the ministers were asked to print them off, fill them out and mail them back to the main office.

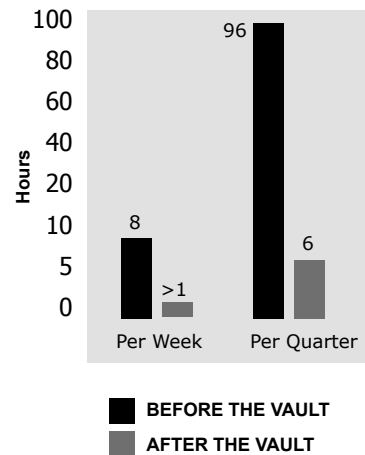

**The Problem:** The time spent e-mailing the reports each month, waiting for them to come back via the United States Postal Service, entering the information and generating reports was neither time productive nor easily obtained.

**iProv's Solution:** Create "The Vault", an online report system where each user would have a user name and password to fill out their monthly reports on the web within a time frame convenient not only for them, but also for the administrators. Multiple reports can be generated, the system sends late notices rather than the administrators having to, and new information can now be more easily attained and deciphered.

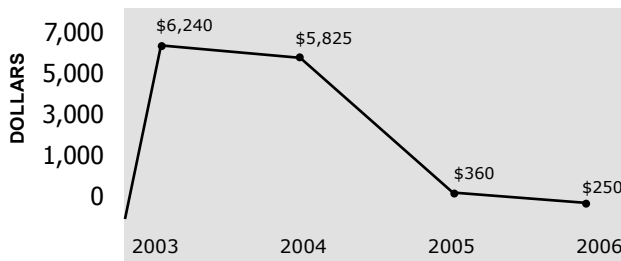

**Time Comparison Chart to Receive Reports Back From Ministers Before & After The Vault**

**Estimated Time Spent on Monthly Reports Before & After The Vault**

**Costs of Personnel Time Spent on Monthly Reports Before & After The Vault**

Savings amount in 2005 from year 1= \$5,880  
Savings amount in 2006 from year 1= \$5,990

**Total savings after implementing = \$11,870**

*"I can truly say The Vault is awesome. The fact that I won't have to enter and tally 35 reports will be a real time saver."*
